## Products Overview

- Taping?
- Products introduction
  - Models introduction
- Taping Therapy

# Taping?

Muscles slowly contract and the pain decreases

- Similar to the skin with an elasticity of more than 30%  
By putting the tape on the skin, skin and muscles will be lifted.  
The space between the skin and the muscle will increase and it will permit for blood and lymph to flow smoothly.  
It will reduce the pain and lets you recover faster in a natural healing way.
