HIGH QUALITY ADHESIVE

- Hypo allergic
- Skin friendly
- Acryl based

HIGH QUALITY FABRIC

- Highest quality standards
- Latex free
- Highly resilient

WHAT IS TAPING?

By lifting the skin, **3NS KINESIOLOGY TAPE** secures space for blood and lymph to flow smoothly again, allowing contusions and congestions to heal quickly. Another important aspect of **3NS TAPE** is pain reduction. Our body can only accept one stimuli at a time and doesn't process further stimulus around the spinal cord once one has been taken into our body. Once applied, **3NS TAPE** will constantly stimulate the sense of touch, which is processed faster than the sense of pain. Because of this, the sense of touch reaches the spinal cord first, blocking off the sense of pain. We feel less pain.

3NS TAPE also gives your body more stability by supporting it with its elasticity of 40%. This elasticity is equivalent to that of the human epidermis providing an ideal grade of support. You can think of 3NS TAPE as a second more resilient skin.

Long Story Short

It lets you recover faster, can correct raise and relieving postures and increases your performance by supporting joints and muscles. Also it can be used for cosmetic purposes such as curing bruises and wrinkles.

PHYSIOLOGICAL EFFECT OF 3NS TAPE

3NS TAPE features a special adhesive with a wave pattern design and an elasticity which is similar to the human skin.

This offers a gentle and effective approach to the re-education of the neuromuscular system, the improvement of blood/lymph circulation and the relief of pain. Providing comfort and stability to your body.

3NS PRODUCTS 01.

ORIGINAL KINESIOLOGY TAPE

For our premium quality tape we only use best materials.

The high quality cotton fabric makes 3NS TAPE breathable and comfortable to wear. Due to the cautiously selected acrylic hypo allergic adhesive it is water-resistant, highly robust and skin friendly. Not to mention that EPOS TAPE is completely Latex free.

All our tapes as well as their raw materials are manufactured in South Korea under highest quality standards. Providing you with nothing but the best equipment.

Having an elasticity of 40% 3NS TAPE is designed to fit comfortably, and will not restrain the body's range of motion. Due to our special skin friendly

adhesive 3NS TAPE keeps irritations to a minimum, even on sensitive skin and the wave style adhesive pattern ensures an improved ventilation as well as effectiveness.

5cm x 5m (2in x 16.4ft)
